

## SOMFY 17 RPM MOTORS

OZ Roll™ supplies and recommends SOMFY motors and use only SOMFY motors in assembled shutters requiring 240v motor operation.

SOMFY is well known as the world leader in tubular motor technology and are continually updating and advancing their product range.

SOMFY offers a range of 17-rpm (revolutions per minute) motors for use in standard roller shutters. This range is an upgrade on the older style 12-rpm motor, but has no other noticeable differences. This 5-rpm increase in motor speed will mean the shutter operating time is decreased by 40% and that is good news for all shutter users.

You may be aware that the tubular motor comes in various different sizes. This is due to the large range of shutter sizes. Tubular motors are classed by the lifting capacity, and that is measured in Nm (Newton metres). The most common Somfy LT 240v motors ordered for standard assembled shutters are 10, 15, and 30Nm motors.

Please see table below for available motor sizes and part numbers

Name	Part	Torque
LT Jet	14.010.000	10Nm
LT Atlas	14.015.000	15Nm
LT Gemini	14.025.000	25Nm
LT Helios	14.030.000	30Nm
LT Mariner	14.040.000	40Nm
LT Vectron	14.050.000	50Nm
