

Extended Guide Section.

Please be advised that we now have available our Extended Guide to provide a more secure fixing.

Our standard guide is **53mm x 22mm** and has a 25mm channel section (this is the section that provided the track that the curtain moves up and down). The extended guide is **69mm x 23mm** and whilst the hollow cavity that supports the leg and provides an area for the fastening points remains the same, the channel section is increased from 25mm to 41mm.

This feature increases the overlap of the curtain into the guide therefore offering more stability in the case of abnormal forces being applied.

Please note that this added width must be taken into account when measuring, especially in the case of "On Wall" shutter.

Part Number	Description
12.120.700	Extended Guide – Mill Finish.
12.121.201	Extended Guide – Wool Pile – White.
12.121.203	Extended Guide – Wool Pile – Brown.
12.121.208	Extended Guide – Wool Pile – Cream.
12.121.211	Extended Guide – Wool Pile – Sand.
12.121.215	Extended Guide – Wool Pile – Black
12.121.218	Extended Guide - Wool Pile – Deep Ocean Blue
12.121.219	Extended Guide – Wool Pile – Woodland Grey

Extrusion Details.

Aluminium Alloy: 6063 – T5

Estimated Area: 3.619 cm²

Estimated Weight: 0.981 kg/m

Estimated Perimeter: 289.04 mm

Finish Perimeter: 169.00 mm

Dimensional Tolerance: +/- 0.25 up to +/-0.6 mm

Profile Details.

Guide Width: 69 mm +/-0.6mm

Guide Thickness: 23mm +/-0.25

Manufactured Length: 5.8 metres

Weather Seal: Single row 6mm Wool Pile.
