## E-Port Control

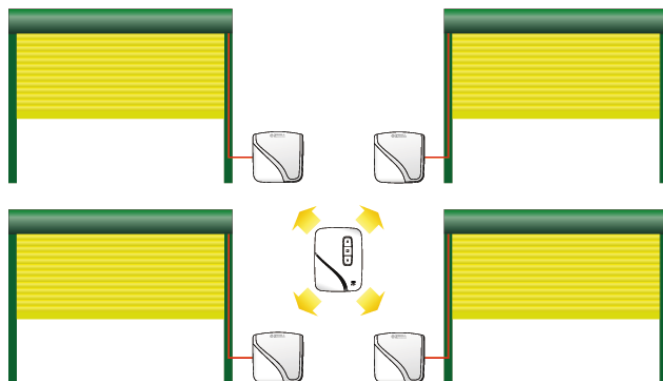

The E-Port 18650 controller is removable and can be used to operate more than one roller shutter further highlighting the overall cost effectiveness of the system.

Available in Standard and RF controls the E-Port has a large battery capacity (1,600mAh) and is designed to operate multiple shutters.

The controller consists of the control circuits, operational switches and re-chargeable Li-Ion batteries. There are also LED indicators showing the operational characteristics.

The E-Port controller is required to work in conjunction with the E-Port Wall Plate allowing for the power to be generated from the battery through to the motor.

The E-Port Control is charged with the new E- Charger (15.580.003).

### Features and Benefits

- Long life Li-Ion batteries
- In Built electronic circuit board
- Intelligent LED indicators
- Safe and Simple charging
- Suits both the T20 tubular motor and the L10 mech.

4 shutters, 4 wallplates, 1 e-port

**\*The new E-Port & Wall Plate will effectively replace the existing Control 10 and Wall plate**

*Product Number: E-Port Control 15.600.001; E-Port Wall Plate 15.551.001*
