

E-Solar

E-Solar is a convenient and cost effective stand alone system that uses renewable energy from the sun.

The E-Solar is designed to be used in conjunction with our **E-Port 18650 Control** (refer to Information Bulletin 67) allowing for a quick and simple installation where the battery is stored inside the home and protected from the elements.

The Solar panel can be mounted on the roof, the building or even on the shutter box.

E-Port 18650 Battery Controller

Powered by nature!

E-Solar is suitable for both the T20 tubular motor and the L10 lateral motor.

Optional charging methods are still available if and when required.

“THE SMARTER SOLAR CHARGING SYSTEM FOR WINDOW ROLLER SHUTTERS”

Solar Panel Product Number: 15.585.000
