### FIXED

A Fixed Panel Louvre offers the simplest form of installation and operation. C channels can be fixed permanently to the top and bottom of the application and the Fixed Panel Louvre then pivots inside the frame work. Flashing will be provided to cover gaps on the left and right of the front and back of the application. H section is also available for joining panels to create strength and stability over multiple panel installation, as well as standoff brackets which offer installation off the window to provide access for ventilation and cleaning.
