

During the spring of 2017 Ozroll began the process of diversifying the product portfolio again by entering into the outdoor blind market. In an industry dominated by manual drive options, Ozroll found a point of difference by offering simple, attractive and easy to install automation. Ozrolls 12V rechargeable drive system was already sought after by blind manufactures internationally, which lead to the development of drive kits to suit a wide range of different awnings and screens as a retrofit option.

After extensive market research, Ozroll chose to affiliate with a well-known and trusted local brand, known as Slidetrack. The patented Slidetrack system had been supplied on thousands of installs Australia wide over the past decade, using Australian sourced, heavy duty and high-quality components. By including Ozroll Drive Systems in a fully assembled Slidetrack product, distributors for both brands then had the opportunity to boost their sales and grow the motorised segment of the market Australia wide. A year later, after realising the synergy between the brands, the Ozroll acquisition of Slidetrack became official and fully assembled, custom made blinds were in production at Ozroll headquarters in Dry Creek, South Australia.

Working closely with Slidetrack's original designer, Ozroll is continuing product development based on distributor feedback. An industry leading locking mechanism that can be operated by foot or with a pull-down stick has been released and Ozroll Roller Shutter boxing has been adapted to the blinds to offer a very affordable, sleek, fully enclosed headbox. Ozroll is now offering the highest quality fully assembled outdoor blind in the industry, with the widest range of control options, through a growing network of distributors.

FEATURES & BENEFITS

- Consistent Build Quality
- Variety of Design Options
- Wide Range of Colour Choices
- 85%, 94% and 99% Block-Out Fabrics,
Plus also PVC Available
- Design and Patent Protected
- Fully Restrained in Tracks
- Sun Protection and Shading
 - Breeze Control
 - Privacy

PATENTS & REGISTERED DESIGNS

Unique tracks, channels and fixing options provide strength, functionality and aesthetics to suit any application.
