

AC Adaptor – E-Series

As part of OZRoll's ongoing product development a new model of the E-Series AC Adaptor is now available.

The new AC Adaptor will be recognisable by a slightly different shape and will have part number **15.580.003**. It is backwards compatible and is a direct replacement for any of the previous OZRoll AC Adaptors.

The AC Adaptor has an output of 24V DC. This output voltage is controlled and regulated by the circuit board in the controller to provide the voltage that is required by the battery during charging.

The new AC Adaptor provides a more efficient and reliable design and is suitable for charging **ALL** OZRoll Controllers.
